Portfolio

PROFESSIONAL SUMMARY

Data Engineer with hands-on experience designing **ETL/ELT pipelines**, data quality frameworks, and cloud-based data solutions. Proficient in **Python, SQL, PySpark, and AWS** with a strong foundation in data modeling, pipeline orchestration, and analytics engineering. **AWS Certified Data Engineer – Associate** and **AWS Certified AI Practitioner**, with practical exposure to scalable data infrastructure across cloud and on-premise environments.

TECHNICAL SKILLS

Languages	Python, SQL, Java, JavaScript
Data Engineering	ETL/ELT Pipelines, Data Modeling, Data Warehousing, Data Quality, Data Lineage
Big Data & Pipeline	Apache Spark (PySpark), Apache Airflow, Databricks, Hadoop
Databases	MySQL, MS SQL Server, MongoDB, PostgreSQL
Cloud & DevOps	AWS (S3, Glue, Lambda, Redshift, Athena), Git, GitHub, CI/CD
Core Concepts	Data Governance, Data Lineage, Agile/Scrum, System Design, DBMS

EXPERIENCE

Crest Infosystems – Software Engineer L1

Jan 2026 – Present

- Designing and developing **end-to-end ETL/ELT pipelines** for data ingestion, transformation, and loading into enterprise data stores.
- Automating data flow processes using **Python and SQL**, implementing validation and quality checks to ensure accuracy and consistency.
- Documenting **data lineage, pipeline specifications**, and transformation logic for compliance and maintainability within an **Agile team**.

Reliance Industries Limited – Vocational IT Trainee

May 2025 – Jun 2025

- Gained hands-on exposure to **enterprise data infrastructure**, SAP-integrated systems, and real-time industrial data environments.
- Observed **data governance policies** and compliance frameworks applied to sensitive production data systems at scale.

PROJECTS

Real-Time Payment Transaction Data Lake

PySpark, AWS S3, Glue, Athena, Airflow, Python

Cloud-native data lake processing 5M+ simulated financial transactions for analytics and reporting.

- Built **PySpark ETL pipelines** to transform, enrich, and partition transaction data by date, merchant, and geography, reducing query latency by **40%** via partition pruning and optimized storage formats (Parquet).
- Implemented **data quality checks** — schema enforcement, duplicate detection, null validation, and transaction integrity — with anomaly logging to an audit table.
- Orchestrated daily batch ingestion using **Apache Airflow DAGs** with retry logic, SLA monitoring, and task-level dependency management.
- Integrated **AWS Glue Catalog and Athena** for serverless querying, enabling self-service BI on the curated data layer.

Fraud Detection Feature Engineering Pipeline

PySpark, Python, Airflow, PostgreSQL, AWS S3

End-to-end feature pipeline generating ML-ready fraud signals from large-scale transaction datasets.

- Engineered fraud-detection features including **transaction velocity, merchant risk scoring, geolocation mismatch, and device behaviour analytics** using distributed PySpark processing.
- Applied **data validation, anomaly detection, and transformation logic** to ensure model-ready data quality; automated pipeline refresh via **Airflow** for reproducible daily runs.
- Designed modular, reusable pipeline components supporting scalable feature generation across multiple fraud analytics work-streams.

Customer 360 Analytics Platform

PySpark, SQL, AWS Glue, Redshift, Airflow

Unified data platform integrating customer, transaction, merchant, and device datasets for BI and reporting.

- Designed **ELT workflows** to standardize and consolidate data from heterogeneous sources into a **star-schema data warehouse on AWS Redshift**, supporting customer segmentation and behavioural analytics.
- Documented **data lineage, schema evolution, and transformation logic** to support governance, auditability, and cross-team maintainability.
- Optimized SQL transformations and Redshift loading strategies, improving analytical query performance and BI report refresh speed.

CERTIFICATIONS

- AWS Certified Data Engineer – Associate** (DEA-C01) [\[view\]](#)
- AWS Certified AI Practitioner** (AIF-C01) [\[view\]](#)

ACHIEVEMENTS

- ISTE National Ideathon Winner 2025**
- Odoo Hackathon Finalist
- Participant – AICTE IdeaLab Tech Fest 2025

EDUCATION

A. D. Patel Institute of Technology – B.Tech – Information Technology | CGPA: **8.58/10**

May 2026

The Radiant International School – Class XII – Science – 82.80%

2022

J. H. Ambani Saraswati Vidyamandir – Class X – 81.60%

2020
